In claim 1, "correlating the inputted product" has been changed to ---correlating inputted product--- without appropriate markings.

In claim 49:

"inputting product quality control measurement data from a plurality of measurement devices, and at least partially correlating inputted product quality control measurement data to the information relating to the at least one part and the information relating to the at least one field"

has been changed to:

---automatically inputting product quality control measurement data regarding a possible part defect from a plurality of measurement devices, and at least partially correlating inputted product quality control measurement data regarding a possible product defect to the information relating to the at least one part and the information relating to the at least one field--- while the previous version of claim 49 recites:

"inputting product quality control measurement data from a plurality of measurement devices, wherein the inputted product quality control measurement data is at least partially correlated to the information relating to the at least one part and the information relating to the at least one field".

Claims 50-52 and 58 contain discrepancies similar to that of claim 49.

Claim 56 includes markings to add "a" before several recitations of "predetermined target", however, these amendments were already made in the previous amendment filed January 11, 2007.

In claim 61, lines 4-5, "wherein the inputted" has been changed to ---wherein inputted--- without appropriate markings.
